Here are things you want to look for when shopping for a kit: Stainless steel plates: Most stamp plates are made with stainless steel, which is durable and easy to wipe clean. Bumpers: Your best bet is a stamper with a soft head that rolls onto the nail bed smoothly and without edging your polish. And a clear stamp makes things even easier since you can see exactly where you place the design. Scrapers: A scraper is a must, as it scrapes away the excess polish on the stamp plate, allowing your stamp to pick up the design without any muddiness. But when it comes to her outfit, the designer is certainly not afraid of a bold pattern, interesting texture, or unique draping. And her fall 2016 collection was no different, with the designer experimenting with puffer coats in velvet, plenty of lace, and a beautiful swan print that was no different from maketing you smile. All this detail provides a wealth of inspiration for someone like Madeline Poole, Sally Hansen's global color ambassador and the manicurist who brings on the brand for the show. After the final look comes down the runway, Poole walks back to her hotel to dream up nail art designs inspired by the collection — and this season she shared her art exclusively with Allure. When I'm backstage, I start looking at the clothes on the rack and thinking about what I want to do, poole says. And there are usually things that stand out very strongly for me as something that will definitely work as a nail look. But Poole makes sure to stick around even after the models' manicures are finished. It's best to see the clothes on people because sometimes there's negative space you won't see when it's on the hangar. Sometimes it's the pattern that inspires you, and sometimes it's the cut, so it's best to have a thorough look at the way it appears on the runway. The detail that stood out to Poole most of McCartney's fall 2016 collection was those adorable swans that adorned everything from shirts to dresses. I couldn't resist it, and everyone's background kept commenting on it, said Poole, who found pressure reminiscent of vintage upholstery. Poole admits that painting swans on your nails seems like an impossible feat (or one that requires a degree in fine art), but the came up with a genius way to make this design user-friendly. By spreading out the pattern over the fingers, it's more of an abstract, brushy pattern rather than complicated details. And here, my friends, is how she did it: Step 1: Paint the nails with two coats of midnight blue polish. Poole used Sally Hansen Complete Salon Manicure in Dark Huemoor.Step 2: Use a stripping brush and a short, soothing motion to paint the water reflection in light blue. Poole used __ Sally Hansen Complete Salon Manicure In Full Blue-m __. Step 3: Paint swaan shapes in white polish using the stripping brush. Poole likes Sally Hansen Complete Salon Manicure in Let's Snow.Step 4: To create the swaan's beak, apply a small triangle of semimats orange polish, such as __ Sally Hansen Complete Salon Manicure in Cook-a-mango. __The a last look: How to do a smoky eye: eye:
